

What Will My MAs Learn?

- What quality improvement is and how to use the model for improvement
- Ways in which data are used to measure the quality of care provided through primary care examples
- Examples of basic tools used in quality improvement and how to apply them in primary care examples
- The benefit of displaying data graphically over time to inform quality improvement efforts

Cost & Model

- \$200 (\$20/hour of content)
- 10 hours of content completed
- Participants receive a certificate of completion that can be used for re-certification
- For registration information, contact:
